

Cailyn Bruno, PG, LSRP

Director of Environmental Services, NJIT Technical Assistance to Brownfield Communities (NJIT TAB)

Ms. Bruno possesses over 16 years of experience in environmental investigation, assessment, and remediation. Her responsibilities include helping communities navigate the brownfields regulatory process; interpreting technical and scientific documents to communities; conducting community workshops and webinars; creating site redevelopment strategies; providing health risk information and recommended safeguards; and developing easy-to-understand tools and guidance on technical and regulatory issues. Her previous experience at private consulting firms includes providing technical oversight of remedial investigations, development of conceptual site models, aquifer characterizations, risk assessments, investigation of new groundwater resources, and wellhead protection strategies. Cailyn holds a BS and MS in Geology and is a New Jersey Licensed Site Remediation Professional and a New York Licensed Professional Geologist.
