 - Water Pollution Control Federation
 - Montgomery Area Committee of 100
 - Chi Epsilon-Civil Engineering Honorary Fraternity

Project Experience Summary

With over 46 years of experience in the environmental field, and experience as a manager in an environmental regulatory agency and consulting. JP Martin serves as a senior multimedia consultant and strategist who is expert in the management of and interrelationship between environmental regulatory issues. JP is particularly adept at understanding the business constraints and basis for issues and then identifying, developing, and analyzing environmental solutions based on those limitations, with an ability to incorporate a strong technical component to those solutions. Many of the solutions he has developed has included regulatory and legal components, and JP is very familiar with developing and defending solutions in this environment. As a studious and consistent student of emerging environmental and infrastructure issues, JP uses his deep understanding and strong consulting skills to guide his clients through complex issues in the field.

JP has managed or played a key role in hundreds of projects with CH2M HILL and Jacobs over his 36-year consulting career. He has managed and/or played a senior consulting role in projects related to both the regulatory and technical components of wastewater treatment, water quality, spill and storm water pollution prevention planning, air pollution permitting, hazardous wastes and UST projects for clients in a wide variety of industries. One of JP's wastewater design projects for a mining site won a national award from the American Consulting Engineers Council.

JP has an important voice and leadership role regarding environmental issues in Industry, and he speaks frequently to groups about these issues. He holds active positions on Manufacture Alabama's Environmental Committee and Conference Planning Committees, and on Alabama Department of Environmental Manager Workgroups. In addition, he was the founder and sponsor of a regional annual conference on water issues. In these positions, he has been responsible for assessing the impacts of regulatory and technical trends and changes on industry in a variety of media, and for subsequently communicating this information to affected industries. He has been responsible for, or participated in, the organization of many conferences and presentations related to these issues. JP also participates closely with senior business leaders in industry, including maintaining a presence on the Montgomery Area Committee of 100, which includes many of the key business leaders in Central Alabama.

Previous Employment

- Before joining CH2M HILL, Mr. Martin worked for ADEM's Water Division, Industrial Branch, where he served as staff environmental engineer and then interim chief, before becoming senior staff engineer. He worked in all phases of industrial processes and wastewater treatment facilities compliance and permitting,

including review and approval of industrial wastewater treatment plans and specifications. He was responsible for developing guidelines for regulating wastewater surface impoundments and land treatment facilities and was project manager for a survey of the groundwater contamination potential of all industrial, municipal, agricultural, and mining wastewater impoundments in the State of Alabama.
